

Minutes of the South Richland Conservancy District's Board Meeting

May 16, 2019

Fulton County Public Library
320 W. 7th Street, Rochester

In attendance were: Joe Hunting, Chairman; Doug Garvison, Vice-Chairman; Jamie Schiff, Treasurer/Financial Clerk.

The minutes from the District's Annual Meeting in February were approved.

Rich Martin provided a report on the water line's operation. Average daily water usage was 4943 gallons in February, 4064 in March, and 4140 in April. A back-up battery was changed at the booster station. Several line locates were called in.

It was decided that Dexter White would be the back up to Rich on the OmniSite alarm system. Dexter lives in Plymouth and works for the Town of Bremen. He is a certified operator. He will be on subcontract with Rich to perform system monitoring and maintenance on Thursdays.

There will be a scheduled flush of the system in May. The booster station generator was serviced in December and will be again in July. The back-flow preventer was tested and passed.

Paul Stork from Wood, LLC gave an update on the groundwater remediation project. Paul handed out graphs showing system performance along with a site plan showing well locations. Plume stability monitoring is the next phase. The first sampling event for this phase was in February. It consisted of the sampling of 30 performance monitoring wells. Almost all wells are looking good, with dramatically reduced concentrations. It was noted that some (MW-59 (46)) had increased, but even they are below original concentrations.

The second stability monitoring event is ongoing. At the end of eight quarters of stability monitoring Wood will assess for data trends. The stability monitoring phase will go on until the end of 2020. The annual sampling of 91 monitoring wells will take place this summer.

The next Board meeting will take place Thursday, August 22 and will commence at 5:30 p.m. It will take place at the Fulton County Rochester library branch, space permitting.

The meeting was thereupon adjourned.
