**RE: Monthly Progress Report – Water Main Design
TORX Facility – Rochester, Indiana
MACTEC Project No.: 3359-09-2469**

Dear Ms. Holz:

The purpose of this correspondence is to provide you with a summary of the water main design activities performed between June 18, 2010 and July 19, 2010. The design activities are in support of the proposed municipal water service extension from the City of Rochester, Indiana to the Acument (Torx) facility located at 4366 North Old US Highway 31. The project consists of performing a topographic survey for the project area (existing stubbed connection on the west side of North Old US Highway 31 near the Dean Food facility to the Torx facility), preliminary engineering, construction drawings and specifications, permit preparation, and construction bidding.

ACTIVITIES PERFORMED

The 30% design was completed and submitted to the City of Rochester for review and comment in early November 2009. Since that time, representatives from MACTEC and Textron have remained in contact with City of Rochester Water Board and jointly conducted open forum meetings with the residents of Rochester, Indiana. On June 29, 2010, Textron and MACTEC attended a meeting with the City of Rochester to discuss the operation and maintenance of the proposed extension with the City of Rochester Water Board. The City of Rochester requested that Textron research two other options to provide water to the residents near the TORX Facility: 1) Purchase water from the City of Rochester through a master water meter from the city line at the Dean Foods Facility and 2) conduct a feasibility study that would evaluate installing a separate well field and water treatment plant outside of the city limits which would supply water to residents near the TORX facility.

ACTIVITIES TO BE PERFORMED

Textron/MACTEC is currently gathering information related to the other water supply options requested to be evaluated by the City of Rochester.

If you have any questions or comments regarding this correspondence, please call our office.

Sincerely,
MACTEC ENGINEERING AND CONSULTING, INC.
