**RE: Monthly Progress Report – Water Main Design  
TORX Facility – Rochester, Indiana  
MACTEC Project No.: 3359-09-2469**

Dear Ms. Holz:

The purpose of this correspondence is to provide you with a summary of the water main design activities performed between March 25, 2010 and April 20, 2010. The design activities are in support of the proposed municipal water service extension from the City of Rochester, Indiana to the Acument (Torx) facility located at 4366 North Old US Highway 31. The project consists of performing a topographic survey for the project area (existing stubbed connection on the west side of North Old US Highway 31 near the Dean Food facility to the Torx facility), preliminary engineering, construction drawings and specifications, permit preparation, and construction bidding.

**ACTIVITIES PERFORMED**

The 30% design was completed and submitted to the City of Rochester for review and comment in early November 2009. Representatives from MACTEC and Textron attended public meetings with the City of Rochester Water Board on March 30, and April 12, 2010 to discuss questions and concerns on the 30% design. The City of Rochester's contract engineer provided comments to the Water Board on the 30% design at the April 12, 2010 meeting.

**ACTIVITIES TO BE PERFORMED**

MACTEC is evaluating the comments on the 30% design received from the City of Rochester's contract engineer.

If you have any questions or comments regarding this correspondence, please call our office.

Sincerely,  
**MACTEC ENGINEERING AND CONSULTING, INC.**
