**RE: Monthly Progress Report – Water Main Design  
TORX Facility – Rochester, Indiana  
MACTEC Project No.: 3359-09-2469**

Dear Ms. Holz:

The purpose of this correspondence is to provide you with a summary of the water main design activities performed between October 21, 2009 and November 23, 2009. The design activities are in support of the proposed municipal water service extension from the City of Rochester, Indiana to the Acument (Torx) facility located at 4366 North Old US Highway 31. The project consists of performing a topographic survey for the project area (existing stubbed connection on the west side of North Old US Highway 31 near the Dean Food facility to the Torx facility), preliminary engineering, construction drawings and specifications, permit preparation, and construction bidding.

**ACTIVITIES PERFORMED**

During the reporting period, the following activities were performed in support of the water main design.

- The 30% design was completed and submitted to the City of Rochester for review and comment.

**ACTIVITIES TO BE PERFORMED**

Next month, we anticipate that the following activities will be performed.

- Receipt of comments on the thirty percent design from the city of Rochester.
- Evaluation of the 30% design review comments.
- Preliminary engineering design work will continue for the booster pump station.

If you have any questions or comments regarding this correspondence, please call our office.

Sincerely,  
**MACTEC ENGINEERING AND CONSULTING, INC.**
